Specifications

Our patented antenna designs shatter the conventional belief that high-gain antennas must be large! Easily mount this antenna on your vehicle or platform for a truly discreet, high-gain connection — especially at low look angles.

Our innovative designs deliver up to three times the gain and significantly improved look angles compared to other solutions available today!

Frequency (SATCOM)	220-380MHz
Frequency (Line of Sight)	220-512MHz
Gain	5+dBic
Power	Max 50w continuous
Dimensions	18" x 18" x 2.5"
Connector	Type N (f) - SATCOM TNC (f) - Line of Sight
Certification	810G
